ROTAX® ENGINES

ROTAX 2-STROKE ENGINES

Heart-thumping power, lightweight design, proven reliability – E-TEC direct-injection engine technology delivers the most sought-after attributes in the snowmobile industry.

Our lineup of 2-stroke engines now includes the brand-new 600 EFI (Electronic Fuel Injection) engine. Reliable, affordable and easy to use, it's an entry-level engine that far exceeds what you thought an entry-level engine had to be.

With E-TEC engine lineup you also get:

- Industry-leading fuel economy[2]
- Excellent oil economy
- Virtually no smoke or smell
- Light, linear throttle pull
- Automatic summerization process

NEW 850 E-TEC TURBO R

- 180 hp up to 2400 meters[1]
- World's first factory-built 2-stroke turbo

850 E-TEC

- 165 horsepower[1]
- Down to 12.3 L/100 km[2]

600R E-TEC

- 125 horsepower[1]
- Down to 11.3 L/100 km[2]

600 EFI

- 85 horsepower[1]
- Down to 13.3 L/100 km[2]

E-TEC engines are the best-selling 2-stroke engines in snowmobiling.[4]

ROTAX ACE™ 4-STROKE ENGINES

With the Advanced Combustion Efficiency (ACE) family of engines, BRP engineers optimized the combustion system, reduced mechanical friction, and freed intake and exhaust breathing. The result is the most efficient engines in snowmobiling. Not only are they efficient, they're a pleasure to operate and own. Very little maintenance is required; they run smoothly and produce a nice, solid – yet quiet – sound.

900 ACE TURBO R

- Rotax-designed turbocharger
- 180 horsepower[1]
- Cable-activated throttle with reconfigured iTC

NEW 900 ACE TURBO – 130 WITH iTC

- 130 horsepower[1]
- Down to 12.1 L/100 km[3]

900 ACE WITH iTC

- 3 cylinders
- 95 horsepower[1]
- Down to 10.8 L/100 km[3]

600 ACE WITH iTC

- 2 cylinders
- 62 horsepower[1]
- Down to 8 L/100 km – the most fuel-efficient in the entire industry[3]

ACE engines are the best-selling 4-stroke engines in snowmobiling.[4]

INTELLIGENT THROTTLE CONTROL

Standard on the ACE engines, the iTC™ system delivers a whole different snowmobiling experience.

- **Driving Modes:** A button on the console enables you to select one of three driving modes. Standard mode ensures a smooth start and linear acceleration; Sport enables full performance and quicker acceleration; ECO® limits top speed and acceleration rates for a more relaxed, fuel-conserving ride.
- **Finger Throttle** (only on 600 ACE and 900 ACE engines without Turbo): The throttle block can be rotate forward for use as a finger throttle, if preferred. Great for changing hand positions on a long ride and for more control through bumps.

1 Observed metric horsepower based on internal dyno test performed in optimal conditions.
2 Data based on internal engineering trail testing.
3 Data based on internal engineering trail testing in ECO mode.
4 Based on retail sale results as of December 31, 2019.

XPS

Experience the advantage of XPS. Oil and care products engineered to extend the life of your ride, tested in the world's harshest conditions, and designed to optimize your vehicle's performance. Learn more at **XPSlubricants.com**

CUSTOMIZE YOUR GOGGLE EXPERIENCE!

Interchangeable lens technology gives you the option to change lenses out on your goggles. Having the option to easily swap lenses if the weather takes a turn means the option to customize your goggle for the most optimal visual experience!

HOW TO CHOOSE LENS COLORS?

On brighter days, a darker or mirror lens will help to protect your eyes more from the harsh reflections of the sun on the snow. Flat light conditions require a lens that will allow more light through so you can use all the available light to your advantage. Medium tint lenses are made to be adaptable to a variety of conditions. Lightly tinted lenses allows as much light in as possible and provides you with enhanced contrast throughout those darker days and snowfall. Clear lenses also for snowfall and dark conditions.

All Radien lenses are UV (UVA/UVB) protected.

MADE IN FINLAND

Svala & Lynx have over 120 years of combined expertise on Nordic winters.

Svala's story began in the 1940s, with the determined women of Kärsämäki, Finland, transforming old army coats into work clothes. Svala's uncompromising R&D work has led to high-quality products on which professionals like cold work specialists rely today.

The first Lynx snowmobile was introduced for winter 1968–1969, developing over decades into a world-wide brand loved by riders on both sides of the Atlantic. Lynx is famous for technical solutions for demanding Nordic conditions – in snowmobiles, but also in equipping the riders to stay comfortable in all winter activities.

THE LYNX X SVALA PRODUCTS are designed and manufactured to keep you warm and comfortable in even the most demanding conditions.

Collaboration highlights Lynx premium layering principles and importance of wearing layers starting from next to skin to perfect mid layers and Balaclavas.

HOW TO MEASURE

HEIGHT: without shoes, standing with heels and back against a wall.

HEAD: around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

ARM LENGTH: let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

CHEST: measure under your arm, around the fullest part of your chest.

WAIST: immediately below the lowest rib.

HIPS: across the fullest part of the seat.

INSEAM: without shoes, from crotch to the floor.

GLOVES: Measure palm width.

BOOTS: Foot lenght from heel to toe.

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.
